The image shows a cardboard box with a top flap and a bottom flap. The top flap has a black background with white text and diagrams. The text reads: "HOW TO OPEN" and "READ DIRECTIONS BEFORE USING". There are three diagrams showing how to open the box. The bottom flap has a white background with black text and a large black arrow pointing down. The text on the bottom flap includes: "POSTMASTER: Contents Merchandise. This package may be opened for postal inspection if necessary. RETURN POSTAGE GUARANTEED". There is a section for a 6-cent stamp with the text "6c STAMP HERE". To the right of this section is the text "DO NOT USE AIRMAIL STAMP WHEN SENDING ORDINARY MAIL". Below the stamp section is the return address: "To: ENCORE CAMERA CO. P. O. Box 208 Hollywood 28, Calif." There are also fields for "NAME", "ADDRESS", "CITY", "ZONE", and "STATE" with dashed lines for writing.

ENSIGN MICKEY MOUSE CAMERA. British Throughout

This picture shows the "Mickey Mouse" Camera parts.

- A. Lens.
- B. Shutter release.
- C. Time and Instantaneous Control.
- D. Film Winder.
- E. Catch to back.
- F. View Finder.

Picture No. 1.

MICKEY MOUSE

WEEKLY

Dear Chum,

Here's your very own Camera, and Isn't it a beauty ! It takes the most lovely pictures I know because we've got a big album full and you can get the films for 6d. per roll (that's for 6 pictures) at all chemists and stockists of "Ensign" photographic materials.

I'm jolly glad you decided to get one of these ripping cameras, because I want all my friends to have one. You see, I want to try and make you happy, and I know that this is a splendid way to do it. Perhaps one day I shall see some of your snaps. That will be grand ! And now—off you go—and Good Luck !

Lots of love,

MICKY

1. Winder Knob 4. Shutter Speed Selector

2. Rewind Ring 5. Accessory Shoe

3. Shutter Release

6. Rewind Knob

When you are ready to rewind the film you must **FIX THE SHUTTER**. Failure to do so may cause the shutter to operate erratically the first few times when you next load film. To rewind ring clockwise by turning **WHILE PUSHING** on the rewind knob until it comes above the viewfinder. This knob pulls up was recently pointed out to me by a gentleman who was kind enough not to point out I am an idiot for not knowing that). Turn the rewind knob clockwise until resistance is felt from the film. This will take far more time than is reasonable. The back may now be opened and the film

FILM ADVANCE / COCKING THE SHUTTER

The film advance lever is a knob to the far right (viewed from the top). Turn the knob clockwise almost 360 degrees until it reaches a firm stop. This will advance the film one frame and

FILM COUNTER

The film counter dial is not geared, so it can be rotated at any time. When you are ready to take your first frame, rotate the dial until the first mark after the "0" is lined up with the black dot at the top of the dial.

LOADING / UNLOADING FILM

Note that this rendering is of a Fed 3. The latching mechanism and its operation are identical.

To access the film compartment you remove the one-piece back. It is secured by two rotating latches on the bottom plate. Rotate each latch toward the outside of the camera body as shown in the illustration above. Slide the back off as shown. Installation is the reverse of this procedure.

Again, note that this rendering is of a Fed 3. The film loading procedures are identical, except that the Zorki 4 takeup spool is removable.

To load film place the 35mm cartridge onto the left spindle, with the film leader placed into the takeup spool on the right. Note that the takeup spool pulls the film UNDER the spool, so feed the leader so that it passes OVER the sprockets and then UNDER the takeup spool. You may find it easier to remove the takeup spool, attach the leader, and place both film cartridge and takeup spool into the camera together.

Additional Instructions for the Iris Flash Candid Camera

The Iris Flash Candid Camera includes improvements over its predecessor model that make it more convenient to operate. It can be used for pictures anywhere and at any time of the day. The latter is possible by using the Univex Photoflash Unit. This unit is used to get flash pictures. The regular instruction book and the instructions cover all the information needed for the operation of the camera.

Instructions for use

No. 5281/1091 engl.

the handling of the camera; read this short and simple booklet with care and you will understand how to make full use of the mechanical advantages given to you, thus you will be certain of a picture from each exposure.

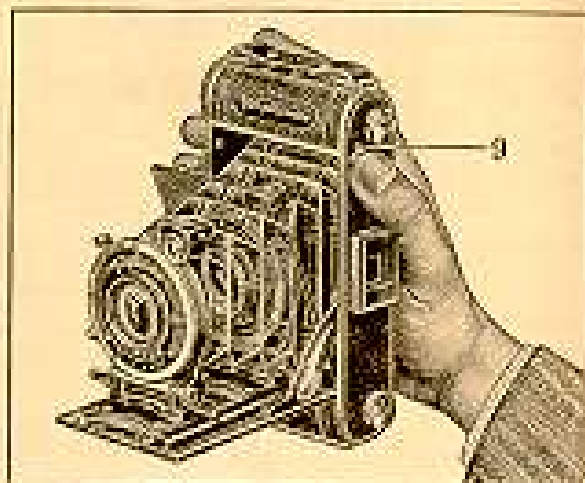

Fig. 2. Opening the Inos II

Opening and Shutting

When opening, the INOS II should be held so that the body is either vertical or tilted slightly downwards. Press the button 9 (fig. 2) on the right-hand side

of the camera, the base-board 13 (fig. 1) will then open and the lens carrier is automatically moved forward to the correct position by a spring. One single movement is thus enough to make the camera ready for an exposure.

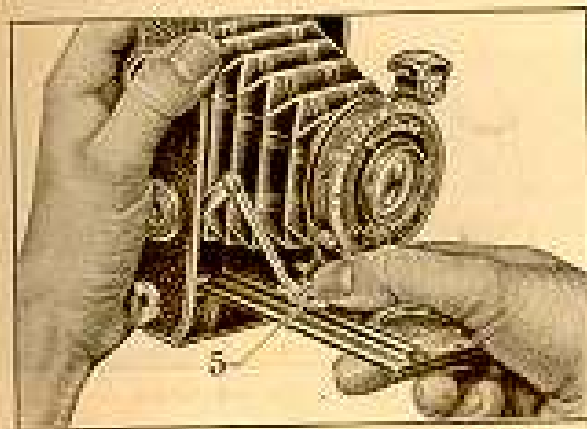

Fig. 3. Pushing home the lens carrier

The closing of the camera is also a moment's work. The lever 5 (fig. 3) is depressed by the right-hand thumb and the lens carrier pushed back as far as it will go. The strut is automatically

FPTV™

DER KENNER
UND DIE

CONTAX

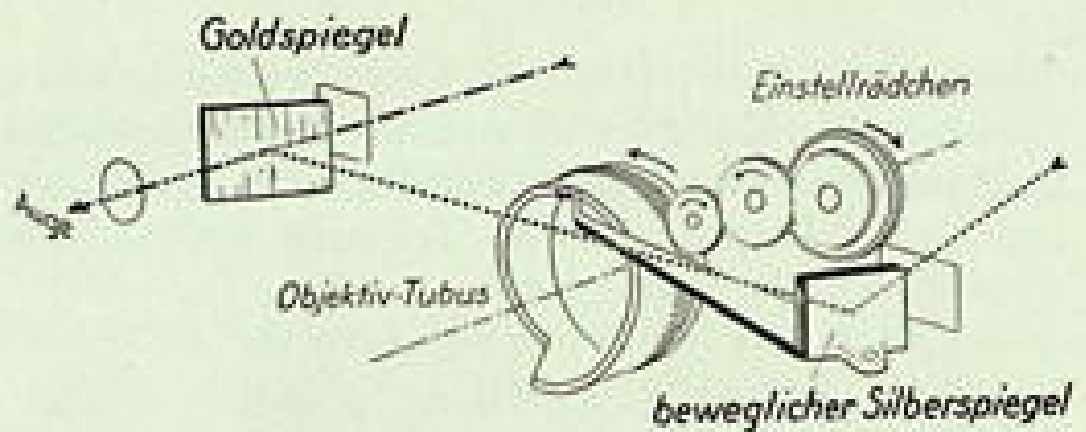

Abb. 24. Schematische Darstellung der automatischen Einstellung der Contax

verwendet die Contax zur Übertragung der einen Bewegung auf die andere

nur einen einzigen Hebel;

hierin liegt eine offensichtliche konstruktive Höchstleistung des Contax-Schärfeneinstellers.

Dieser Übertragungshebel, der gleichzeitig den beweglichen Spiegel des Entfernungsmessers trägt, gleitet auf einer starr mit dem Objektiv verbundenen Steuerkurve.
