John W. Ishii

John W. Ishii is an American Japanese photographer who spent his childhood in Malaysia during the 60's and 70's.

Now a freelance photographer and photojournalist, he roams the picturesque Malaysian country side looking for interesting stories and photo essays.

Professionally trained at the University of Washington in Seattle, Washington, John's home town love for the Japanese brought him back. Currently working in several projects, John will be having a solo show featuring his work in Japan, Malaysia and Indonesia.

Stay tuned for the all Black and White exhibit "Vanishing Trades of Malaysia."
