

Sonnar T* 180mm F2.8

MINOLTA XK UNPRECEDENTED AND UNAPPROACHED IN ALL OF PHOTOGRAPHY

Electronic photography is what the Minolta XK is all about. It presents accomplished amateur and professional photographers with an uncommon combination: Automatic exposure, electronically-timed shutter, and interchangeable finders all in one incomparable 35mm SLR.

The XK is clearly a substantial departure from what has gone before. Yet it does not forsake its own heritage. The smooth, fast feel so typical of

Minolta cameras remains. And the XK is compatible with every Rokkor Lens ever made. All accessories for Minolta SLR cameras will also fit the XK. And new Rokkor-X Lenses and accessories have been developed together with the camera creating a back-up system that goes on and on.

Photography with the XK is a completely different experience. Examine the camera thoroughly and see if you don't agree.
