NIKON F2/T

NIKON F3 HP

The Nikon F-80's accessory shoe lets you directly mount a wide range of Nikon dedicated electronic speedlights, including SB-24, SB-23, SB-22, SB-20, SB-16, SB-100 and SB-15. Each unit takes full advantage of the F-80's fine-tuned cybernetic controls, which automatically synchronize the camera's shutter and lens aperture to provide precisely controlled exposures. This means you can perform Cybernetic Sync Flash in TTL mode in every flash shooting situation, for beautiful, naturally balanced foregrounds and backgrounds with a truly professional look.

Cybernetic Sync Flash lets you choose any of the four different flash categories shown, matching your speedlight TTL mode with the appropriate metering system and exposure mode.

Speedlight setting		SB-24 at TTL 	SB-23/SB-22/SB-20/ SB-16/SB-15 at TTL	SB-100 at TTL 
Metering system	Exposure mode			
Matrix Metering	MD/MR/SL	Matrix-Balanced Full Flash		Matrix TTL Flash
Center-Weighted Metering	CD/CR/CA	Center-Balanced Full Flash		Center-Balanced TTL Flash
